- Get ready to pass the 1z0-1066-22 exam right now using our 1z0-1066-22 exam package, which includes 1z0-1066-22 practice test plus an 1z0-1066-22 APP and Mobile App.

As long as you are determined to learn **Test 1z0-1066-22 Dump** our Oracle practice questions, your efforts will eventually pay off.

NEW QUESTION: 1 Simple Network Management Protocol v2 (SNMP v2) is used frequently to monitor networks. Which of the following vulnerabilities does it always introduce?**A.** Man-in-the-middle attack**B.** Cross site scripting**C.** Remote buffer overflow**D.** Clear text authentication**Answer: D****Explanation:** Explanation One of the main problems with using SNMP v1 and v2 is the clear text "community string" that it uses to authenticate. It is easy to sniff and reuse. Most times, the SNMP community string is shared throughout the organization's servers and routers, making this authentication problem a serious threat to security. There have been some isolated cases of remote buffer overflows against SNMP daemons, but generally that is not a problem. Cross site scripting is a web application vulnerability that is not related to SNMP. A man-in-the-middle attack against a user datagram protocol (UDP) makes no sense since there is no active session; every request has the community string and is answered independently.

NEW QUESTION: 2 **A.** Option **E**. Option **A**. Option **C**. Option **D**. Option **B**. Option **D****Answer: D**

NEW QUESTION: 3 You are developing an application that consumes an external web service that returns the latest stock rate. The application has two methods: The `getResults()` method makes an AJAX web service request. The `ShowRate()` method displays the stock rate from the web service response. You need to ensure that the `ShowRate()` method always displays the latest stock rate. Which code segment should you use?**A.** Option **A**. Option **C**. Option **B**. Option **D****Answer: D****Explanation:** Explanation/Reference: " always displays the latest stock rate ". Should use `cache: false`**Note:** `cache` (default: true, false for dataType 'script' and 'jsonp')**Type:** Boolean**If set to false, it will force requested pages not to be cached by the browser.****Reference:** `jQuery.ajax()`
