**NEW QUESTION: 1**HOTSPOTYour company has a main office and a branch office. An Active Directory site exists for each office.The network contains an Active Directory forest named contoso.com. The contoso.com domain contains three member servers named Server1, Server2, and Server3. All servers run Windows Server 2012 R2.In the main office, you configure Server1 as a file server that uses BranchCache.In the branch office, you configure Server2 and Server3 as BranchCache hosted cache servers.You are creating a Group Policy for the branch office site.In the branch office, you need to configure the client computers that run Windows 8 to use Server2 and Server3 as BranchCache.**Answer:** Explanation:

**NEW QUESTION: 2**Which two statements about HDLC operations in asynchronous balanced mode are true?(Choose two.)**A.** Either device can initiate transmission of frames.**B.** Each device must negotiate with its neighbors before sending frames.**C.** Each device must negotiate with its neighbors to recover from framing errors.**D.** Either device can send frames at any time.**E.** The initiating device sends a DTE frame.**Answer: A,D**

**NEW QUESTION: 3**Your network contains a domain controller named DC1 that runs Windows Server 2012 R2. You create a custom DataCollector Set (DCS) named DCS1.You need to configure DCS1 to collect the following information:The amount of Active Directory data replicated between DC1 and the other domain controllersThe current values of several registry settingsWhich two should you configure in DCS1? (Each correct answer presents part of the solution. Choose two.)**A.** System configuration information**B.** Event trace data**C.** A performance counter**D.** A Performance Counter Alert**Answer: A,C**

**NEW QUESTION: 4**A user has created a queue named "myqueue" with SQS. There are four messages published to queue which are not received by the consumer yet. If the user tries to delete the queue, what will happen?**A.** It will delete the queue**B.** It will initiate the delete but wait for four days before deleting until all messages are deleted automatically.**C.** It will ask user to delete the messages first**D.** A user can never delete a queue manually. AWS deletes it after 30 days of inactivity on queue**Answer: A**Explanation:Explanation/Reference:Explanation:SQS allows the user to move data between distributed components of applications so they can perform different tasks without losing messages or requiring each component to be always available. The user can delete a queue at any time, whether it is empty or not. It is important to note that queues retain messages for a set period of time. By default, a queue retains messages for four days.
