Please contact us if you have any questions, We can make promise that you will harvest enough knowledge and happiness from our C\_TS411\_2022 test engine.

**NEW QUESTION: 1** A networked PC has started to display adware pop-ups when the user opens the browser. Which of the following best practices should the technician employ FIRST when responding to the problem?  
**A.** Schedule scans and run updates in safe mode  
**B.** Disable System Restore  
**C.** Create a System Restore point  
**D.** Quarantine the system  
**Answer: D**

**NEW QUESTION: 2** Which of these recommendations should be followed before capturing a workload? (Choose all that apply.)  
**A.** Define inclusion and exclusion filters.  
**B.** Start the capture database in UNRESTRICTED mode, then start the capture.  
**C.** Make sure your replay database has the same structure as the capture database, except without data.  
**D.** Make sure the replay and capture databases are similar in data content.  
**E.** Perform a clean shutdown and restart of the capture database before beginning a workload capture.  
**Answer: D,E**

**NEW QUESTION: 3** You have just recompiled a new kernel and rebooted your system with the new kernel. Unfortunately you are getting "Can't locate module" error messages. Which of the following is most likely to be the source of the problem?  
**A.** You did not configure modular support into the kernel.  
**B.** You did not install the modules.  
**C.** You copied the modules to the wrong directory.  
**D.** You did not run depmod after installing the modules.  
**Answer: A**  
**Explanation:** There is one more step needed for the build process, however. You have created the kernel, but now you need to create all the loadable modules if you have them configured. Be aware that typical distribution kernels tend to have almost every feature installed, plus a few others for good measure. These can typically take an hour or so to build on our Athlon XP1800. The stock kernels are somewhat leaner by default and take, on average, 25 minutes to compile. To build the modules we run: \$ make modules If you forget to enter make modules command, you will get that message. Follow these steps while recompile the kernel. Installation steps  
cd/usr/src/bzcatlinux-2.4.17.tar.bz | tar xvf -cdlinuxmakeconfig | make menuconfig | make xconfigmakemakecleanmakebzImage /boot/vmlinuz-2.4.17cp.config /boot/config2.4.17mkinitrd/boot/initrd-<version> <kernel version> # Depending on kernel configurationUpdate LILO or GRUBReboot into new kernel
