We always lay great emphasis on the quality of our C-TS414-2021 study materials, Free Demo is provided for you, C-TS414-2021 exam braindumps are popular with examinees.

If without a quick purchase process, users of our C-TS414-2021 quiz guide will not be able to quickly start their own review program, Finally when it comes to APP online version of C-TS414-2021 test braindumps, as long as you open this study test engine, you are able to study whenever you like and wherever you are.

Badges provide industry validation of [Valid HPE2-N71 Exam Cram](#) your expertise and greater security for your certification credential.

NEW QUESTION: 1 Which of the following is not a component of a production strength Blue Prism Environment?
A. Desktop Bot
B. Application Server
C. Interactive client
D. Database Server
E. Runtime Resource
Answer: A

NEW QUESTION: 2 In subway monitoring, Huawei mainly focuses on special monitoring systems and police monitoring systems other than vehicle monitoring.
A. TRUE
B. FALSE
Answer: A

NEW QUESTION: 3 Ihr Marketing-Team erstellt eine neue Website, die Sie für eine 99,99-prozentige Verfügbarkeit ausgleichen müssen. Sie müssen eine Lösung für beide Computer im Web-AS-Verfügbarkeitssatz bereitstellen und konfigurieren, um den Lastausgleich der Website über HTTP zu ermöglichen. Die Lösung muss den Load Balancer Ihrer Ressourcengruppe verwenden. Was sollten Sie über das Azure-Portal tun?
Answer: Explanation: See explanation below.
Explanation To distribute traffic to the VMs in the availability set, a back-end address pool contains the IP addresses of the virtual NICs that are connected to the load balancer. Create the back-end address pool to include the VMs in the availability set.
Step 1: Select All resources on the left menu, and then select LoadBalancer from the resource list.
Step 2: Under Settings, select Backend pools, and then select Add.
Step 3: On the Add a backend pool page, select the Web-AS availability set, and then select OK.

Topic 4, Contoso Case Study
Overview
Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York. The Montreal office has 2,000 employees. The Seattle office has 1,000 employees. The New York office has 200 employees. All the resources used by Contoso are hosted on-premises. Contoso creates a new Azure subscription. The Azure Active Directory (Azure AD) tenant uses a domain named contoso.onmicrosoft.com. The tenant uses the P1 pricing tier.
Existing Environment
The network contains an Active Directory forest named contoso.com. All domain controllers are configured as DNS servers and host the contoso.com DNS zone. Contoso has finance, human resources, sales, research, and information technology departments. Each department has an organizational unit (OU) that contains all the accounts of that respective department. All the user accounts have the department attribute set to their respective department. New users are added frequently. Contoso.com contains a user named User1. All the offices connect by using private links. Contoso has data centers in the Montreal and Seattle offices. Each data center has a firewall that can be configured as a VPN device. All infrastructure servers are virtualized. The virtualization environment contains the servers in the following table. Contoso uses two web applications named App1 and App2. Each instance on each web application requires 1GB of

memory. The Azure subscription contains the resources in the following table. The network security team implements several network security groups (NSGs). Planned Changes Contoso plans to implement the following changes: * Deploy Azure ExpressRoute to the Montreal office. * Migrate the virtual machines hosted on Server1 and Server2 to Azure. * Synchronize on-premises Active Directory to Azure Active Directory (Azure AD). * Migrate App1 and App2 to two Azure web apps named webApp1 and WebApp2. Technical requirements Contoso must meet the following technical requirements: * Ensure that WebApp1 can adjust the number of instances automatically based on the load and can scale up to five instances. * Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office. * Ensure that routing information is exchanged automatically between Azure and the routers in the Montreal office. * Enable Azure Multi-Factor Authentication (MFA) for the users in the finance department only. * Ensure that webapp2.azurewebsites.net can be accessed by using the name app2.contoso.com. * Connect the New York office to VNet1 over the Internet by using an encrypted connection. * Create a workflow to send an email message when the settings of VM4 are modified. * Create a custom Azure role named Role1 that is based on the Reader role. * Minimize costs whenever possible.
