NEW QUESTION: 1 Where should the passive-interface command be used?
A. Under the routing process for interfaces that need to be routed, but prevented from peering
B. Under the interface configuration for interfaces that need to be routed, but prevented from peering
C. Under the interface configuration for interfaces that need to be routed and allowed to peer
D. Under the routing process for interfaces that need to be routed and allowed to peer
E. Under the VTY configuration within global configuration mode
Answer: A
Explanation: Passive-interface is a feature you enable on a per interface basis which allows a particular interface to participate in a routing process but prevents that interface from forming neighbor relationships by not sending hello packets and discarding received hello packets.

NEW QUESTION: 2
