So you can rest assure of the accuracy and authority of our P-SAPEA-2023 latest pdf study, But it is based on WEB browser, After your payment is successful, we will send you an email within 5 to 10 minutes.

NEW QUESTION: 1In the past, people thought that the Earth was flat and that a ship that sailed too far would fall off the edge of the world. The Earth appears flat because the Earth is too large for humans on Earth to see its curvature. Several events helped shed the misconceptions. For one, during a lunar eclipse, the Earth is positioned between the sun and the moon. It eclipses the moon by casting a shadow on it. The shadow the Earth casts is round. When Magellan circumnavigated the Earth, he proved that one could not fall off the edge of the Earth, because the Earth was round and had no edges. Finally, space missions provided us with images of our round Earth from far away and showed us how beautiful our planet looks, even from a distance. With which misconception about the Earth is the passage concerned?**A.** that the Earth was in the center of the solar system**B.** that the Earth could be eclipsed by the sun**C.** that the Earth was created at the same time as the sun**D.** that the Earth turned**E.** that the Earth was flat

Answer: EExplanation:Explanation/Reference:Explanation:The whole passage is focused on listing evidence that the Earth is round, not flat. Choice a is not a misconception. Choices b, d, and e were not discussed in the passage.

NEW QUESTION: 2Which statement about GLBP is true?**A.** They communicate under TCP port 3222 for both source and destination.**B.** They become restricted if any of the existing forwarding switches fail.**C.** They become active if any of the existing forwarding switches fail.**D.** Unused bandwidth is never utilized.**Answer: C**

NEW QUESTION: 3**A.** FCoE**B.** HBAC**C.** iSCSI**D.** NFS**Answer: A**

NEW QUESTION: 4You write the following code in your Web page:

```
protected void Page_Load  
(object sender, EventArgs e){/* additional code here */}
```

You expect this code to be executed in response to the Load event of the ASP.NET page. However, when you request the page, you notice that the method is not executed.What should you do to make sure that the Page_Load method is executed when the Load event of the Wep page is fired?**A.** Set the AutoEventWireup attribute of the @page directive to false.**B.** Set the IsPostBack property of the page class to true.**C.** Set the AutoEventWireup attribute of the @page directive to true.**D.** Set the IsPostBack property of the page class to true.**Answer: C**
