NEW QUESTION: 1The goal of an investor following a risk management strategy is to:**A.** control or reduce risk even though doing so will increase expected return**B.** increase risk because doing so will increase expected return**C.** control or reduce risk even though doing so will decrease expected return**Answer: C**Explanation:Risk management or hedging seeks to reduce risk. In a well-functioning market, decreased risk is associated with decreased expected return.

NEW QUESTION: 2SIMULATIONClick to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam. OverviewThe following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You plan to deploy several Azure virtual machines and to connect them to a virtual network named VNET1007. You need to ensure that future virtual machines in VNET1007 can register their name in an internal DNS zone named corp7523690.com. The zone must NOT be hosted on a virtual machine. What should you do from Azure Cloud Shell? To complete this task, start Azure Cloud Shell and select PowerShell(Linux). Click Show Advanced Settings, and then enter corp7523690n1 in the Storage account text box and File1 in the File share text box. Click Create storage, and then complete the task.**A.** Step 1: New-AzureRMResourceGroup -name MyResourceGroup Before you create the DNS zone, create a resource group to contain the DNS zone. Step 2: New-AzureRmDnsZone -Name corp7523680.com -ResourceGroupName MyResourceGroup A DNS zone is created by using the New-AzureRmDnsZone cmdlet. This creates a DNS zone called corp7523680.com in the resource group called MyResourceGroup.**B.** Step 1: New-AzureRMResourceGroup -name MyResourceGroup Before you create the DNS zone, create a resource group to contain the DNS zone. Step 2: New-AzureRmDnsZone -Name corp7523690.com -ResourceGroupName MyResourceGroup A DNS zone is created by using the New-AzureRmDnsZone cmdlet. This creates a DNS zone called corp7523690.com in the resource group called MyResourceGroup.**Answer: B**Explanation:References: <https://docs.microsoft.com/en-us/azure/dns/dns-getstarted-powershell>

NEW QUESTION: 3 Who are the target users for the Field Edition?
A. Commanders
B. Forward deployed field operators, Collection teams and Plans/Operations
C. Power users
D. Analysts
Answer: A
Explanation: The Field and Mobile Editions are stand-alone, synchronizable devices designed for rapid start-up and capable of operating independently for long periods of time. They exchange data with other editions whenever possible. These editions support mobile users, such as commanders, who require availability of the most critical services even with no network connection.

NEW QUESTION: 4 You work in an international company which is named Wiikigo. Before entering this company, you have two years of experience in the IT field, as well as experience implementing and administering any Windows client operating system in a networked environment. You are professional in installing, upgrading and migrating to Windows 7, deploying Windows 7, and configuring Hardware and Applications and son on. You are in charge of two computers that are respectively named C01 and C02. C01 runs Windows 7 and C02 runs Windows XP Professional. On C01, you enable Remote Desktop as shown in the Remote Desktop exhibit. What action should you perform?
A. The Client (Respond Only) IPsec policy should be assigned on C02.
B. Your user account should be added to the Remote Desktop Users group on C01.
C. A firewall exception should be created for the Remote Desktop Protocol (RDP) should be assigned on C02.
D. You should enable the Allow connections from computers running any version of Remote Desktop setting on C01.
Answer: D
