NEW QUESTION: 1What are two sources of information for determining whether the firewall has been successful in communicating with an external UserID Agent?**A.** System Logs and Authentication Logs.**B.** System Logs and the indicator light under the UserID Agent settings in the firewall.**C.** Traffic Logs and Authentication Logs.**D.** System Logs and an indicator light on the chassis.**Answer: B**

NEW QUESTION: 2Which statement about vector graphics is true?**A.** They are made up of pixels.**B.** They are also know as raster images.**C.** They are resolution independent.**D.** They are resolution dependent.**Answer: C**

NEW QUESTION: 3You have two computers that run Windows 7. Both computers are connected to a network and have IP addresses within the 172.16.10.0/24 subnet.You need to ensure that both computers can join a HomeGroup.What should you do?**A.** Change the IP addresses to be within the 192.168.1.0/24 subnet.**B.** Configure Windows Firewall to allow the Netlogon service.**C.** Set the network location to Home network.**D.** Enable network discovery.**Answer: C**Explanation:Windows Firewall does not allow you to create firewall rules for specific network locations on the basis of port address. Windows Firewall does not allow you to create rules that differentiate between the home and work network locations. You can only create rules that differentiate on the basis of home and work or public network locations.HomeGroup ConnectionsThis option decides how authentication works for connections to HomeGroup resources. If all computers in the HomeGroup have the same user name and passwords configured, you can set this option to allow Windows to manage HomeGroup connections. If different user accounts and passwords are present, you should configure the option to use user accounts and passwords to connect to other computers. This option is available only in the Home/Work network profile.

NEW QUESTION: 4What three Work Areas are used to review and manage actionable items before the closing period?**A.** The Receivables Balances Work Area for invoicing and adjustment approval related activities.**B.** The Billing Work Area for invoicing and adjustment approval related activities**C.** The Receivables Balances Work Area for customer payment and credit application processing**D.** The Revenue Adjustments Work Area for customer payment and credit application processing.**E.** The Revenue Adjustments Work Area for contingencies affecting revenue recognition**Answer: B,C,E**Explanation:A: Use the Billing workarea to perform

tasks related to customer billing activities. Monitor and review incomplete transactions, and approve and research pending adjustments. Use AutoInvoice to import transactions from other systems and generate invoices and credit memos automatically according to your requirements. You can easily review and correct AutoInvoice import errors and resubmit AutoInvoice. Create new invoices, debit memos, credit memos, and on-account credit memos. Perform related activities to manage your transactions: update, duplicate, credit, adjust, dispute, and preview a transaction. You can also create a new customer record and manage existing customers from the Billing workarea.B: Use the Receivables Balances workarea to perform tasks related to customer payment activities and the management of accounts receivable balances. Review actionable items, including open receipts and receipt batches, unapplied and on-account receipts and credit memos, receipt remittance batches, and funds transfer errors.C: Revenue Management WorkareaUse the Revenue Management workarea to perform tasks related to revenue recognition and revenue adjustmentsReference: Oracle Fusion Receivables: Overview
