**NEW QUESTION: 1** Identify three valid options for adding a pluggable database (PDB) to an existing multitenant container database (CDB). **A.** Use the DBMS\_PDB package to plug an Oracle 12c non-CDB database into an existing CDB. **B.** Use the DBMS\_PDB package to clone an existing PDB. **C.** Use the CREATE PLUGGABLE DATABASE statement to create a PDB using the files from the SEED. **D.** Use the CREATE DATABASE . . . ENABLE PLUGGABLE DATABASE statement to provision a PDB by copying file from the SEED. **E.** Use the DBMS\_PDB package to plug an Oracle 11 g Release 2 (11.2.0.3.0) non-CDB database into an existing CDB. **Answer: A,B,C** Explanation: Use the CREATE PLUGGABLE DATABASE statement to create a pluggable database (PDB). This statement enables you to perform the following tasks: \* (A) Create a PDB by using the seed as a template Use the create\_pdb\_from\_seed clause to create a PDB by using the seed in the multitenant container database (CDB) as a template. The files associated with the seed are copied to a new location and the copied files are then associated with the new PDB. \* (C) Create a PDB by cloning an existing PDB Use the create\_pdb\_clone clause to create a PDB by copying an existing PDB (the source PDB) and then plugging the copy into the CDB. The files associated with the source PDB are copied to a new location and the copied files are associated with the new PDB. This operation is called cloning a PDB. The source PDB can be plugged in or unplugged. If plugged in, then the source PDB can be in the same CDB or in a remote CDB. If the source PDB is in a remote CDB, then a database link is used to connect to the remote CDB and copy the files. \* Create a PDB by plugging an unplugged PDB or a non-CDB into a CDB Use the create\_pdb\_from\_xml clause to plug an unplugged PDB or a non-CDB into a CDB, using an XML metadata file.

**NEW QUESTION: 2** Sentinel News is a publisher of over 100 newspapers around the country, with the exception of the Midwestern states. The company's CFO, Harry Miller, has been reviewing a number of potential candidates (both public and private companies) that would provide Sentinel News entrance into the Midwestern market. Recently, the founder of Midwest News, a private newspaper company, passed away. The founder's family members are inclined to sell their 80% controlling interest. The family members are concerned that Midwest News's declining newspaper circulation is not cyclical, but rather permanent. The family members would reinvest the cash proceeds from the sale of Midwest News into a diversified portfolio of stocks and bonds. Miller's staff collects the financial information shown in Exhibit 1. Miller noted that Midwest News does not pay a dividend, nor does the company have any debt. The most comparable publicly traded stock is Freedom Corporation. Freedom, however, has significant radio and television operations. Freedom's estimated beta is 0.90, and 40% of the

company's capital structure is debt. Freedom is expected to maintain a payout ratio of 40%. Analysts are forecasting the company will earn \$3.00 per share next year and grow their earnings by 6% per year. Freedom has a current market capitalization of \$15 billion and 375 million shares outstanding. Freedom's current market value equals its intrinsic value. Miller's staff uses current expectations to develop the appropriate equity risk premium for Midwest News. The staff uses the Gordon growth model (GGM) to estimate Midwest's equity risk premium. The equity risk premium calculated by the staff is provided in Exhibit 2. Miller believes the best method to estimate the required return on equity Midwest News is the build-up method. All relevant information to determine Midwest News's required return on equity is presented in Exhibit 2. The specific-company premium reflects concerns about future industry performance and business risk in Midwest News. Miller makes two statements concerning the valuation methodology used to value Midwest News's equity. Statement 1: The required return estimate that is calculated from Exhibit 2 reflects all adjustments needed to make an accurate valuation of Midwest News. Statement 2: It is better to use the free cash flow model to value Midwest News than a dividend discount model. Miller considered two different valuation models to determine the price of Midwest News's equity: a single-stage free cash flow model and a single-stage residual income model. Using the single-stage residual income model and assuming the required return on equity is 15%, the value of Midwest News is closest to: (use information in Exhibits 1 and 2) **A. \$115 per share. B. \$75 per share. C. \$95 per share. Answer: B**
