NEW QUESTION: 1When adjusting the slider to allocate resources for a Resource Pool, the yellow indicator on the resource bar indicates:**A.** A warning flag set at 75% of the available resource amount**B.** The minimum required resource amount**C.** The recommended resource amount**D.** The maximum available resource amount**Answer: C**

NEW QUESTION: 2Which of the following could be classified as ROT Data?**A.** Records data hidden in piles of unstructured data**B.** Operational records that need to be retained**C.** High-value company information that needs to be identified**D.** Trivial data that has no value to the company or the user**Answer: D****Explanation:**The IBM@ Legacy Data Cleanup solution improves information economics through the clean up of redundant, obsolete and trivial (ROT) data. It can remediate regulated data according to personally identifiable information (PII), payment card industry (PCI), Health Insurance Portability and Accountability Act (HIPPA) and human resources policies and improve the security of data with high-business value. The Legacy Data Cleanup solution helps organizations increase the value derived from data while reducing the costs and risks associated with managing it.
