NEW QUESTION: 1 Which of the following tools combines two programs, and also encrypts the resulting package in an attempt to foil antivirus programs? **A.** EliteWrap **B.** NetBus **C.** TinyD. Trojan Man **Answer: D**

NEW QUESTION: 2 Scenario Please read this scenario prior to answering the Question You are serving as the Lead Architect for a chain of convenience stores, operating as a franchise, which has over 5000 retail outlets throughout the Asia-Pacific region. The stores operate 24 hours a day and 7 days a week and rely on point-of-sale technology to manage their inventory. Stores place all orders on-line. The back-office systems collect realtime data to support ordering and product selection decisions including the tailoring of product assortment based on sales history, customer demographics as well as the next day's weather forecast. In many cases, several stores are located in neighboring areas. This strategy makes distribution to each store cheaper, as well as making multiple deliveries per day possible. An Enterprise Architecture practice exists within the company, with the CEO and CIO as joint sponsors. They have decided to adopt TOGAF 9 within the practice and the first project is to restructure the Enterprise Architecture so that it can better accommodate the changing strategies within the company and also better respond to changes in economic and technical environments. The CIO has stated that the following issues need to be addressed in the restructuring: -The systems should be able to withstand any unforeseen disruptions which might affect day today operations. This is highly critical for ensuring high levels of customer satisfaction and maintaining and growing revenue. -Dependencies between the application components, the application platform, and technology infrastructure should be minimal and well defined. This will facilitate scalability and ease of enhancement of the service offerings. -The company is adopting the ARTS Operational Data Model and Data Warehouse Model from the National Retail Federation. This will address past problems with data quality and inconsistent data. -To remain competitive, new products and promotions must undergo market trials and if these are successful, deployed across the retail chain. Information systems must be able to manage changes and updates without undue delays. Refer to the Scenario [Note: You should assume that the company has adopted the example set of principles that are listed and defined in TOGAF, Section 23.6. You may need to refer to Chapter 23 of the reference text in order to answer this question.] You have been asked to identify the most relevant architecture principles for the current situation. Based on TOGAF, which of the following is the best answer? [Note: The ordering of the principles listed in each

answer is not significant.]**A.** Interoperability, Data is Accessible, Data is Shared, Requirements Based Change, Control Technical Diversity**B.** Interoperability, Maximize Benefit to the Enterprise, Data Trustee, Data is an Asset, Responsive Change Management**C.** IT Responsibility, Data Security, Ease of Use, Requirements Based Change, Common Use Applications**D.** Technology Independence, Business Continuity, Common Vocabulary and Data Definitions, Data Trustee, Responsive Change Management**Answer: D**

NEW QUESTION: 3Your network contains one Active Directory domain named contoso.com. The domain contains 10 file servers that run Windows Server 2012 R2. You plan to enable BitLocker Drive Encryption (BitLocker) for the for the operating system drives of the file servers. You need to configure BitLocker policies for the file servers to meet the following requirements:
* Ensure that all of the servers use a startup PIN for operating system drives encrypted with BitLocker.
* Ensure that the BitLocker recovery key and recovery password are stored in Active Directory. Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.**Answer:** Explanation: Explanation
Choice 1: Require additional authentication at startup
Choice 2: Choose how BitLocker-protected operating system drives can be recovered* Choice 1: Require additional authentication at startup This policy setting is used to control which unlock options are available for operating system drives. You can set this option to Require startup PIN with TPM
Choice 2: Choose how BitLocker-protected operating system drives can be recovered This policy setting is used to configure recovery methods for operating system drives. In Save BitLocker recovery information to Active Directory Domain Services, choose which BitLocker recovery information to store in Active Directory Domain Services (AD DS) for operating system drives. If you select Store recovery password and key packages, the BitLocker recovery password and the key package are stored in AD DS. Storing the key package supports recovering data from a drive that is physically corrupted. If you select Store recovery password only, only the recovery password is stored in AD DS. Reference: BitLocker Group Policy Settings
