Cheryl fills five containers with different amounts of the same substance as shown in the diagram below. The contents of all five containers are kept at the same 50(degrees) Celsius temperature. To remain buoyant, an object must displace a mass of liquid equal to its own mass. Shown below are five identical corks each placed in small vials, containing equal volumes of liquids that have different salt concentrations. Add an Application Load Balancer with session stickiness in front of all web node containers.** **B. Use an Application Load Balancer at both the web and application tiers, setting session stickiness at the target group level for both tiers.** **C. Enable session stickiness on the Application Load Balancer, but take advantage of the native WebSockets protocols available to the Network Load Balancer.** **D.
