**NEW QUESTION: 4** To specify the node name for the NAS file server when processing NAS file systems, use the NASNODENAME option on the command line, or place in which file?  
**A.** Include/exclude list  
**B.** Backup copy group  
**C.** Server options file  
**D.** Client options file  
**Answer: D**  
Explanation: Explanation Use the nasnodename option to identify the NAS file server. Place the nasnodename option in your client system-options file (dsm.sys). The value in the client system-options file is the default, but this value can be overridden on the command line. If the nasnodename option is not specified in the client system-options file, you must specify this option on the command line when processing NAS file systems.
