NEW QUESTION: 1The MAIN purpose of a transaction audit trail is to:**A.** provide useful information for capacity planning.**B.** reduce the use of storage media.**C.** help an IS auditor trace transactions.**D.** determine accountability and responsibility for processed transactions.
Answer: D
Explanation:Enabling audit trails aids in establishing the accountability and responsibility for processed transactions by tracing them through the information system. Enabling audit trails increases the use of disk space. A transaction log file would be used to trace transactions, but would not aid in determining accountability and responsibility. The objective of capacity planning is the efficient and effective use of IT resources and requires information such as CPU utilization, bandwidth, number of users, etc.

NEW QUESTION: 2By default, which access rule is applied inbound to the inside interface?**A.** All IP traffic is permitted.**B.** All IP traffic sourced from any source to any less secure network destinations is permitted.**C.** All IP traffic is denied.**D.** All IP traffic sourced from any source to any more secure network destinations is permitted
