NEW QUESTION: 1 Which option describes what occurs with asymmetric routing when an IPS normalization engine is enable?**A.** It must see a valid SYN/ACK before it lets a flow pass, otherwise the IPS normalization engine assumes that it is in encountering an evasion attack and drops the return packets.**B.** It allows the return packets back to the source path.**C.** It must see a valid ACK/ACK before it lets a flow pass.**D.** It must see a valued SYN/ACK before it lets a flow pass, otherwise the IPS normalization engine assumes that is is encountering a fragmentation attack, and it drops the return packets**Answer: A**

NEW QUESTION: 2 **A.** dynamic NAT **B.** static NAT **C.** identity NAT **D.** dynamic PAT **Answer: A,B**
Explanation: Adding Network Objects for Mapped Addresses For dynamic NAT, you must use an object or group for the mapped addresses. Other NAT types have the option of using inline addresses, or you can create an object or group according to this section.* Dynamic NAT:+ You cannot use an inline address; you must configure a network object or group.+ The object or group cannot contain a subnet; the object must define a range; the group can include hosts and ranges.+ If a mapped network object contains both ranges and host IP addresses, then the ranges are used for dynamic NAT, and then the host IP addresses are used as a PAT fallback.* Dynamic PAT (Hide):+ Instead of using an object, you can optionally configure an inline host address or specify the interface address.+ If you use an object, the object or group cannot contain a subnet; the object must define a host, or for a PAT pool, a range; the group (for a PAT pool) can include hosts and ranges.* Static NAT or Static NAT with port translation:+ Instead of using an object, you can configure an inline address or specify the interface address (for static NAT-with-port-translation).+ If you use an object, the object or group can contain a host, range, or subnet.* Identity NAT+ Instead of using an object, you can configure an inline address.+ If you use an object, the object must match the real addresses you want to translate.

NEW QUESTION: 3 Which of the following is/are true under accrual accounting?
I. Expenses are recognized as services are used.
II. Revenues are recognized when service is performed.
III. Revenues are recognized in proportion to expenditures incurred.
IV. Revenues are matched with the associated costs.**A.** I & III **B.** II, III & IV **C.** I, II, III & IV **D.** I, II & IV **Answer: D**
Explanation:
Explanation/Reference: Explanation: Accrual accounting follows the Matching Principle, which requires that revenues and gains be recognized when earned and expenses and losses be recognized when incurred. Under this, (I), (II) and (IV) are correct. However, (III) is not

necessarily true.
