A. Configure the custom properties of the App1 service template.
B. Modify the App1 service template.
C. Modify the Application Configuration settings of the App1 service template to include settings followed by #.
D. Modify the Application Configuration settings of the App1 service template to include settings enclosed by @.
Answer: A
Explanation:An application package can contain settings to be entered when you configure the service for deployment. To format this type of setting, enter the parameter in the Value field, in this format: @<SettingLabel>@. For example, you might prompt for the instance name of a SQL Server for a SQL Server database tier application by using the parameter@ SQLServerInstanceName@.
Scenario: Deploy five instances of a multi-tier application named App1 by using a VMM service template. Each instance will have different deployment settings.
