In order to meet your personal habits, you can freely choose any version within PDF, APP or PC version, Excellent preparation is required to pass SAP Certified Associate C_SAC_2402.

NEW QUESTION: 1

クラウドコンピューティングの多くの側面と機能により、eDiscoveryへのコンプライアンスが困難または高コストになる可能性があります。

クラウドコンピューティングのどの側面が最も複雑な要素になりますか？ **A.**

幅広いネットワークアクセス **B.** 移植性 **C.** 実測サービス **D.** マルチテナンシー **Answer: D**

Explanation: With multitenancy, multiple customers share the same physical hardware and systems. With the nature of a cloud environment and how it writes data across diverse systems that are shared by others, the process of eDiscovery becomes much more complicated. Administrators cannot pull physical drives or easily isolate which data to capture. They not only have to focus on which data they need to collect, while ensuring they find all of it, but they also have to make sure that other data is not accidentally collected and exposed along with it. Measured service is the aspect of a cloud where customers only pay for the services they are actually using, and for the duration of their use. Portability refers to the ease with which an application or service can be moved among different cloud providers. Broad network access refers to the nature of cloud services being accessed via the public Internet, either with or without secure tunneling technologies. None of these concepts would pertain to eDiscovery.

NEW QUESTION: 2 A corporate environment includes an on-premise deployment of Exchange Server 2010 SP1 with standalone Edge Transport servers in a perimeter network. The company plans to move a subset of Exchange users to a cloud-based Exchange Server 2010 SP1 service. The security team has the following requirements: -Manage mailbox audit logging for the on-premise and cloud-based Exchange servers. -Search message tracking logs for all on-premise Exchange servers. -You need to recommend a solution that meets the requirements. What should you recommend? **A.** Use group policy to manage audit settings. Add the security team members to the Server Management management role group in both environments. **B.** Add the security team members to the Organization Management, Recipient Management, and Records Management management role groups in both environments. Add the security team members to the local Administrators group on each of the on-premise Exchange servers. **C.** Use group policy to manage audit settings. Add the security team members to the local Administrators group on each of the on-premise Exchange servers. **D.** Add the security team members to the Organization Management, Recipient Management, Records Management, and Server Management management role groups in both environments. **Answer: B** Explanation: Local Administrators The Exchange Auditing log contains a record of audited events and the Event Viewer has an ACL that prevents typical users from clearing the event log. If a local administrator took ownership of the appropriate registry key, reset the CustomSD value, and then restarted the server, the administrator could clear the Exchange Auditing log. [http://technet.microsoft.com/en-us/library/ee221156\(v=exchg.80\).aspx](http://technet.microsoft.com/en-us/library/ee221156(v=exchg.80).aspx)

NEW QUESTION: 3Your network contains an Active Directory domain named contoso.com. You deploy a web-based application named App1 to a server named Server1.App1 uses an application pool named AppPool1. AppPool1 uses a domain user account named User1 as its identity.You need to configure Kerberos constrained delegation for User1.Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Select and Place:****Answer:** Explanation: Explanation: first answer should be "setspn -L" - to check for SPNs of User1. After that we should add HTTP SPN for User1 "setspn -s" so delegation tab appears and we can select "Trust this user for delegation to specified services only"

NEW QUESTION: 4次のものを含むMicrosoft Skype for Business Server 2015 オンプレミス環境をサポートしています。* 3つのフロントエンドサーバーを備えたEnterprise Edition フロントエンドプール* ミラー化されたバックエンドSQL データベース* フロントエンドプールとエッジプールの両方でハードウェアロードバランサ (HLB) を使用します。* 境界ネットワークに2つのサーバーを持つエッジサーバープール環境は10,000ユーザーをサポートし、高可用性モードで実行されます。一部のユーザーは、特定の公衆電話交換網 (PSTN) 番号に発信コールを発信できないと報告しています。彼らがそうしようとする、コールが接続されているように見えますが、その後は高速のビジートーンで落ちて、次のエラーメッセージが表示されます："ネットワークエラーが原因で、この時点でコールを完了できません。" 問題のトラブルシューティングが必要です。どの集中ログシナリオを使用しますか？**A.** LYSSAndUC**B.** IncomingAndOutgoingCall**C.** MediaConnectivity**D.** HybridVoice**Answer: B**
