NEW QUESTION: 1What document is required to build the Statement of Work?**A.** installation report**B.** site survey report**C.** post-survey questionnaire**D.** pre-survey questionnaire**Answer: D**
Explanation:Explanation/Reference:Explanation:

NEW QUESTION: 2The implementations group has been using the test bed to do a 'proof-of-concept' that requires both Client 1 and Client 2 to access the WEB Server at 209.65.200.241. After several changes to the network addressing, routing scheme, DHCP services, NTP services, layer 2 connectivity, FHRP services, and device security, a trouble ticket has been opened indicating that Client 1 cannot ping the 209.65.200.241 address. Use the supported commands to isolate the cause of this fault and answer the following questions. On which device is the fault condition located?**A.** R1**B.** R3**C.** R2**D.** ASW1**E.** DSW1**F.** ASW2**G.** DSW2**H.** R4**Answer: E**
Explanation:On DSW1, VALN ACL, Need to delete the VLAN access-map test1 whose action is to drop access-list 10; specifically 10.2.1.3

NEW QUESTION: 3Which of the following tools is less likely to be used by a hacker?**A.** John the ripper**B.** Crack**C.** Tripwire**D.** l0phtcrack**Answer: C**
Explanation:"Other security packages, such as the popular Tripwire data integrity assurance packages, also provide a secondary antivirus functionality. Tripwire is designed to alert administrators of unauthorized file modifications. It's often used to detect web server defacements and similar attacks, but it also may provide some warning of virus infections if critical system executable files, such as COMMAND.COM, are modified unexpectedly. These systems work by maintaining a database of hash values for all files stored on the system. These archive hash values are then compared to current computed

values to detect any files that were modified between the two periods." Pg. 224 Tittel: CISSP Study Guide
