Pass Guaranteed Quiz The Best JN0-664 - Service Provider, Professional (JNCIP-SP) New Braindumps Pdf

JN0-664 exam materials will help you pass the exam and get the certificate successfully, We do things differently With JNCIP-SP JN0-664 Exam Test Questions.

I have confidence in our Estruturit products that soon Estruturit's exam questions and answers about Juniper JN0-664 will be your choice and you will pass Juniper certification JN0-664 exam successfully.

With our JN0-664 study questions, you can easily get your expected certification as well as a brighter future, All in all, no matter which way you choose to study, you are bound to pass exam.

Actually the passing rate of JNCIP-SP JN0-664 exam dumps is very high, In this respect, our JN0-664 practice materials can satisfy your demands if you are now in preparation for a JN0-664 certificate.

And you can use them at ease, Providing various and efficient dumps with reasonable [3V0-21.23 Passing Score Feedback](#) prices and discounts, satisfy your need with considerate aftersales services and we give back all your refund entirely once you fail the test unluckily.

NEW QUESTION: 1 A company is using RecoverPoint to protect their environment. They need to add a new Replication Set to a Consistency Group that will have an extremely high I/O load. What would best meet their needs?
A. Devote an RPA to just that Consistency Group
B. Increase the Consistency Group journal volume size
C. Use the Distributed Consistency Group feature
D. Increase the number of storage LUNs for the journal
Answer: C

NEW QUESTION: 2 CORRECT TEXT Scenario Given the new additional connectivity requirements and the topology diagram, use ASDM to accomplish the required ASA configurations to meet the requirements. New additional connectivity requirements: - Currently, the ASA configurations only allow on the Inside and DMZ networks to access any hosts on the Outside. Your task is to use ASDM to configure the ASA to also allow any host only on the Outside to HTTP to the DMZ server. The hosts on the Outside will need to use the 209.165.201.30 public IP address when HTTPing to the DMZ server. - Currently, hosts on the ASA higher security level interfaces are not able to ping any hosts on the lower security level interfaces. Your task in this simulation is to use ASDM to enable the ASA to dynamically allow the echo-reply responses back through the ASA. Once the correct ASA configurations have been configured: - You can test the connectivity to <http://209.165.201.30> from the Outside PC browser. - You can test the pings to the Outside (www.cisco.com) by opening the inside PC command prompt window. In this simulation, only testing pings to www.cisco.com will work. To access ASDM, click the ASA icon in the topology diagram. To access the Firefox Browser on the Outside PC, click the Outside PC icon in the topology diagram. To access the Command prompt on the Inside PC, click the Inside PC icon in the topology diagram. Note: After you make the configuration changes in ASDM, remember to click Apply to apply the configuration changes. Not all ASDM screens are enabled in this simulation, if some screen is not enabled, try to use different methods to configure the ASA to meet the requirements. In this simulation, some of the ASDM screens may not look and function exactly like the real ASDM. **Answer:** Explanation: Follow the explanation part to get answer on this sim question. Explanation: First, for the HTTP access we need to create a NAT object. Here I called it HTTP but it can be given any name. Then, create the firewall rules to allow the HTTP access: You can verify using the outside PC to HTTP into 209.165.201.30. For step two, to be able to ping hosts on the outside, we edit the last service policy shown below: And then check the ICMP box only as shown below, then hit Apply. After that is done, we can ping www.cisco.com again to verify:

NEW QUESTION: 3 ネットワークには、contoso.comという名前のオンプレミスのActive Directoryドメインが含まれています。ドメインには、次の表に示すユーザーが含まれています。Azure AD ConnectをインストールしてSSOを有効にする予定です。SSOを有効にするために使用するユーザーを指定する必要があります。ソリューションでは、最小

限の特権の原則を使用する必要があります。どのユーザーを指定する必要がありますか？**A.**
ユーザー**1B.** ユーザー**2C.** ユーザー**3D.** ユーザー**4Answer: C**
