Explanation We create a VPN gateway. Step 1: On the left side of the portal page, click + and type 'Virtual Network Gateway' in search. In Results, locate and click Virtual network gateway. Step 2: At the bottom of the 'Virtual network gateway' page, click Create. This opens the Create virtual network gateway page. Step 3: On the Create virtual network gateway page, specify the values for your virtual network gateway. Gateway type: Select VPN. VPN gateways use the virtual network gateway type VPN. Virtual network: Choose the existing virtual network VNET01-USEA2. Gateway subnet address range: You will only see this setting if you did not previously create a gateway subnet for your virtual network. Step 4: Select the default values for the other setting, and click create. The settings are validated and you'll see the "Deploying Virtual network gateway" tile on the dashboard. Creating a gateway can take up to 45 minutes.

Note: This task may take a very long time to complete. You do NOT need to wait for the deployment to complete this task successfully. References:
