NEW QUESTION: 1You need to debug a Windows Service application by using breakpoints. What should you do?**A.** Write all events to an event log.**B.** Set the Windows Service status to Paused.**C.** Use the Attach to Process menu in Microsoft Visual Studio.**D.** Implement the Console.WriteLine method throughout the Windows Service.**Answer: C****Explanation:** Explanation/Reference:* Because a service must be run from within the context of the Services Control Manager rather than from within Visual Studio, debugging a service is not as straightforward as debugging other Visual Studio application types. To debug a service, you must start the service and then attach a debugger to the process in which it is running.* To debug a serviceInstall your service.Start your service, either from Services Control Manager, Server Explorer, or from code.In Visual Studio, choose Attach to Process from the Debug menu. Etc.
