A. Route 3
B. Route 1
C. Route 2
D. Route 4
Answer: A

NEW QUESTION: 4 A XYZ security System Administrator is reviewing the network system log files. He notes the following: - Network log files are at 5 MB at 12:00 noon. - At 14:00 hours, the log files are at 3 MB. What should he assume has happened and what should he do about the situation?
A. He should contact the attacker's ISP as soon as possible and have the connection disconnected.
B. He should disconnect from the Internet to discontinue any further unauthorized use, because an attack has taken place.
C. He should log the file size, and archive the information, because the router crashed.
D. He should log the event as suspicious activity, continue to investigate, and take further steps according to site security policy.
E. He should run a file system check, because the Syslog server has a self-correcting file system problem.
Answer: D
Explanation: You should never assume a host has been compromised without verification. Typically, disconnecting a server is an extreme measure and should only be done

when it is confirmed there is a compromise or the server contains such sensitive data that the loss of service outweighs the risk. Never assume that any administrator or automatic process is making changes to a system. Always investigate the root cause of the change on the system and follow your organizations security policy.
