To increase people's knowledge and understanding of this 220-1101 exam, so as to improve and direct your practice, our experts made the 220-1101 study questions diligently and assiduously all these years.

So our 220-1101 study materials can be called perfect in all aspects.

**NEW QUESTION: 1**Your network contains an Active Directory domain named contoso.com. The domain contains three member servers. The servers are configured as shown in the following table. All client computers run Windows 8. All client computers receive updates from Server2. On Servers, you add a shared printer named Printer1. Printer1 uses a Type 4 driver that is not included in the Windows 8 installation media. You need to ensure that when users connect to the printer for the first time, the printer driver is installed automatically on their client computer. What should you do?  
**A.** From the Windows Deployment Services console on Server1, add the driver package for Printer1.  
**B.** From Windows PowerShell on Server3, run the Add-PrinterDriver cmdlet.  
**C.** From the Print Management console on Server3, add additional drivers for Printer1.  
**D.** From the Update Services console on Server2, import and approve updates.  
**Answer: C**

**NEW QUESTION: 2**Which Cisco Nexus feature is best managed with DCNM-SAN?  
**A.** AA  
**B.** VSSC. virtual switches  
**D.** domain parameters  
**Answer: D**  
**Explanation:**The Fibre Channel domain (fcdomain) feature performs principal switch selection, domain ID distribution, FC ID allocation, and fabric reconfiguration functions as described in the FC-SW-2 standards. The domains are configured on a per VSAN basis. If you do not configure a domain ID, the local switch uses a random ID. This section describes each fcdomain phase:  
\*Principal switch selection - This phase guarantees the selection of a unique principal switch across the fabric.  
\*Domain ID distribution - This phase guarantees each switch in the fabric obtains a unique domain ID.  
\*FC ID allocation - This phase guarantees a unique FC ID assignment to each device attached to the corresponding switch in the fabric.  
\*Fabric reconfiguration - This phase guarantees a resynchronization of all switches in the fabric to ensure they simultaneously restart a new principal switch selection phase.

**NEW QUESTION: 3**Which two chat systems integrate with Rational Team Concert? (Choose two.)  
**A.** Lync  
**B.** WebEx  
**C.** Sametime  
**D.** Jabber  
**Answer: C,D**

**NEW QUESTION: 4**Note: This question is part of a series of questions that present the same scenario. Each question in this series contains a unique solution. Determine whether the solution meets the stated goals.  
The Account table was created by using the following Transact-SQL statement: There are more than 1 billion records in the Account table. The Account Number column uniquely identifies each account. The ProductCode column has 100 different values. The values are evenly distributed in the table. Table statistics are refreshed and up to date. You frequently run the following Transact-SQL SELECT statements: You must avoid table scans when you run the queries. You need to create one or more indexes for the table.  
Solution: You run the following Transact-SQL statement: CREATE NONCLUSTERED INDEX IX\_Account\_ProductCode ON Account(ProductCode); Does the solution meet the goal?  
**A.** Yes  
**B.**

NoAnswer: AExplanation:ExplanationReferences:
