NEW QUESTION: 1You are playing around with setting up stacks using JSON templates in CloudFormation to try and understand them a little better. You have set up about 5 or 6 but now start to wonder if you are being charged for these stacks.What is AWS's billing policy regarding stack resources?**A.** You are charged for the stack resources for the time they were operating (but not if you deleted the stack within 60 minutes)**B.** You are not charged for the stack resources if they are not taking any traffic.**C.** You are charged for the stack resources for the time they were operating (even if you deleted the stack right away)**D.** You are charged for the stack resources for the time they were operating (but not if you deleted the stack within 30 minutes)**Answer: C**Explanation:Explanation/Reference:Explanation:A stack is a collection of AWS resources that you can manage as a single unit. In other words, you can create, update, or delete a collection of resources by creating, updating, or deleting stacks. All the resources in a stack are defined by the stack's AWS CloudFormation template. A stack, for instance, can include all the resources required to run a web application, such as a web server, a database, and networking rules. If you no longer require that web application, you can simply delete the stack, and all of its related resources are deleted. You are charged for the stack resources for the time they were operating (even if you deleted the stack right away).
<http://docs.aws.amazon.com/AWSCloudFormation/latest/UserGuide/stacks.html>

NEW QUESTION: 2The application includes multiple Windows Workflow Foundation (WF) hosts along with thousands of instances.The application will continue to execute over extended periods of time.You need to ensure that the performance of the application does not degrade over extended periods of time.Which type of testing should you perform on the application?**A.** Duration testing**B.** Scalability testing**C.** Stress testing**D.** Functional testing**Answer: A**

NEW QUESTION: 3What are two reasons a company would choose a cloud deployment over an on-prem deployment? (Choose Two)**A.** In a cloud environment, the company controls technical issues. On-prem environments rely on the service provider to resolve technical issue.**B.** Cloud resources scale automatically to an increase in demand. On-prem requires additional capital

expenditure.**C.** In a cloud environment, the company is in full control of access to their data. On-prem risks access to data due to service provider outages**D.** Cloud deployments require long implementation times due to capital expenditure processes. On-Prem deployments can be accomplished quickly using operational expenditure processes.**E.** Cloud costs adjust up or down depending on the amount of resources consumed. On- Prem costs for hardware, power, and space are ongoing regardless of usage**Answer: B,E**Explanation:
