NEW QUESTION: 2A company has offices in multiple geographic locations. The sites have high-latency, low-bandwidth connections. You need to implement a multisite Windows Deployment Services (WDS) topology for deploying standard client device images to all sites. Solution: At each site, you deploy a local WDS server that runs only the Transport role. You configure local DHCP servers to direct local clients to the local WDS server.Does this meet the goal?**A.** No**B.** Yes**Answer: B**

NEW QUESTION: 3Which of the following is used in database information security to hide information?**A.** Polyinstantiation**B.** Inheritance**C.** Delegation**D.** Polymorphism**Answer: A**
Explanation:Polyinstantiation represents an environment characterized by information stored in more than one location in the database. This permits a security model with multiple levels-of-view and authorization. The current problem with polyinstantiation is ensuring the integrity of the information in the database. Without an effective method for the simultaneous updating of all occurrences of the same data element - integrity cannot be guaranteed.

NEW QUESTION: 4Which of the following statements is true with respect to a change in values?**A.** The process of questioning values will result in a change.**B.** Values are not fixed, and when they change, they change quickly.**C.** Values are established in early years and are unlikely to change.**D.** Values are neither stable nor enduring.**Answer: C**
Explanation:Values are specific to each individual and involve moral and personal issues. They tend to be learned in childhood from parents, friends, and others. Values can be modified throughout life but ordinarily tend to stay the same.
