**NEW QUESTION: 1** Which three tasks need to be accomplished to allow successful publishing of process metrics to BAM? Select three. **A.** setting BPM project preferences to enable BAM as a data target **B.** importing BAM dashboards **C.** updating the Enterprise Manager configuration for Disable Action **D.** configuring the BAM Adapter on the SOA server **Answer: A,B,D** **Explanation:** **A:** Configuring the BPM project for BAM monitoring **1.** Open the BPM Project in JDeveloper (if not already open). **2.** Navigate to the BPM Project Navigator panel (use View menu if needed). **3.** Right-click on the project, QuoteProcessLab, and select Project Preferences **4.** In the Data Targets tab, select Enable BAM as a data target for process analytics. **B:** The Oracle BAM Adapter is a Java Connector Architecture (JCA)-compliant adapter that can be used from a Java EE client to send data and events to the Oracle BAM Server. **Note:** Business activity monitoring (BAM) is software that aids in monitoring of business activities, as those activities are implemented in computer systems. Oracle Business Activity Monitoring (Oracle BAM) gives business executives the ability to monitor their business services and processes in the enterprise, to correlate KPIs down to the actual business process themselves, and most important, to change business processes quickly or to take corrective action if the business environment changes. Oracle BAM is a component of both SOA Suite and BPM Suite. Oracle BAM provides a framework for **\*Creating dashboards that display real-time data inflow. (D) \*Creating rules to send alerts under specified conditions. \*Designing Web applications with graphs displaying active data.**

**NEW QUESTION: 2** Which of the following statements best explains why internal auditors map processes? **1.** To obtain audit evidence to support auditor's observations. **2.** To determine scope and objectives of the audit. **3.** To facilitate the identification of ownership and responsibility for key risks. **4.** To identify potential efficiency improvements. **A.** 2 and 4. **B.** 1 and 2. **C.** 3 and 4. **D.** 1 and 3. **Answer: C**

**NEW QUESTION: 3** Ein Techniker untersucht Konnektivitätsprobleme über das Unternehmensnetzwerk. Der Techniker versucht, Telnet in einen Zugangspunkt im Pausenraum zu leiten, der mit AP-1 gekennzeichnet ist. Es ist jedoch nicht möglich, fortzufahren oder sich zu authentifizieren. Welcher der folgenden Befehle ist für die Ermittlung der Konnektivitätsprobleme am vorteilhaftesten? **A.** ipconfig **B.** nslookup **C.** Tracerc **D.** netstat **Answer: C**

**NEW QUESTION: 4**You work in a company which is named Wiikigo Corp. The company uses SQL Server 2008. You are the administrator of the company database. Now you are in charge of a SQL Server 2008 instance. You are going to use the data collector to gather performance data periodically on all instances. You must store all collected data in the same database. This database is hosted on a single instance. Every five hours, you have to collect and load performance data in the management data warehouse. Which data collection process should you implement?**A.** You should create an on-demand non-cached data collection**B.** You should create a scheduled non-cached data collection.**C.** You should create a cached data collection**D.** You should create two different SQL Agent jobs. The two jobs are scheduled at the same time. One job uploads the data collection and the other job creates a data collection.**Answer: B**  
Explanation: Data collection and upload Specifies how data is collected and uploaded to the management data warehouse. Pick one of the following options. Non-cached. Collection and data upload on the same schedule. When selected, specify one of the following: On-demand. Data is collected and uploaded on demand. Schedule. Data is collected and uploaded according to a schedule. Click Pick to select from a predefined list of schedules, or click New to create a new schedule.
