The pdf demo questions are questions and answers which are part of the complete D-NWG-DS-00 study torrent.

**NEW QUESTION: 1** XYZ Is a Chemical manufacturing company. On a daily basis, it produces 100 kilos of Item A from a single production batch. 100 kilos of item A manufactured from a single batch has a single expiration date. However, the purity of item A varies as follows: Category 1: 95% Category 2: 85% Category 3: 50% From an implementation perspective, which setup or process would meet this requirement? **A.** Enable lot control. Map three categories as co products. **B.** Enable lot control for item A Create three child lots and link them with the parent lot. **C.** Enable lot and serial control for item A Create one lot and three categories that are mapped with serial numbers. **D.** Enable lot and grade control for item A Have three categories mapped with grades. **E.** Enable lot control for Item A Create three lots to represent the categories. **Answer: D** Explanation: Explanation/Reference: Explanation:

**NEW QUESTION: 2** You have an Azure Storage account. You plan to copy one million image files to the storage account. You plan to share the files with an external partner organization. The partner organization will analyze the files during the next year. You need to recommend an external access solution for the storage account. The solution must meet the following requirements: \* Ensure that only the partner organization can access the storage account. \* Ensure that access of the partner organization is removed automatically after 365 days. What should you include in the recommendation? **A.** Azure policies **B.** shared access signature (SAS) **C.** shared keys **D.** Azure Blob storage lifecycle management policies **Answer: B** Explanation: Explanation A shared access signature (SAS) is a URI that grants restricted access rights to Azure Storage resources. You can provide a shared access signature to clients who should not be trusted with your storage account key but to whom you wish to delegate access to certain storage account resources. By distributing a shared access signature URI to these clients, you can grant them access to a resource for a specified period of time, with a specified set of permissions. Reference: <https://docs.microsoft.com/en-us/rest/api/storageservices/delegate-access-with-shared-access-signature>

**NEW QUESTION: 3** Which file defines the fields for each object used in the file objects.C (color, num/string, default value...)?**A.** \$FWDIR/conf/classes.**B.** \$FWDIR/conf/table.**CC.** \$FWDIR/conf/fields.**CD.** \$FWDIR/conf/scheam.**Answer: A**
