NEW QUESTION: 1Your company is launching a public website that allows users to stream videos.You upload multiple video files to an Azure storage container.You need to give anonymous users read access to all of the video files in the storage container.What should you do?**A.** Edit the container metadata and set the access policy to Public Blob.**B.** Edit each blob's metadata and set the access policy to Public Blob.**C.** Edit the container metadata and set the access policy to Public Container.**D.** Move the files into a container sub-directory and set the directory access level toPublic Blob.**Answer: A**Explanation:By default, the container is private and can be accessed only by the account owner. To allow public read access to the blobs in the container, but not the container properties and metadata, use the "Public Blob" option. To allow full public read access for the container and blobs, use the "Public Container" option.
