You can choose different ways of operation [1z1-076 Test Preparation](#) according to your learning habits to help you learn effectively.

NEW QUESTION: 1After implementing the IKEv2 tunnel, it was observed that remote users on the 192.168.33.0/24 network are unable to access the internet. Which of the following can be done to resolve this problem?
A. Change to an IKEv1 configuration since IKEv2 does not support a full tunnel with static peers
B. Change the local traffic selector on the headquarter ASA to 0.0.0.0/0
C. Change the remote traffic selector on the headquarter ASA to 0.0.0.0/0
D. Change the Diffie-Hellman group on the headquarter ASA to group5 for the dynamic crypto map
E. Change the remote traffic selector on the remote ASA to 192.168.22.0/24
Answer: E
Explanation: The traffic selector is used to determine which traffic should be protected (encrypted over the IPsec tunnel). We want this to be specific, otherwise Internet traffic will also be sent over the tunnel and most likely dropped on the remote side. Here, we just want to protect traffic from 192.168.33.0/24 to 192.168.22.0/24.

NEW QUESTION: 2Where does price determination occur when a purchase order is created in ERP against a central contract?
