Experience Real Exam Environment with **Network-Security-Essentials Test Pdf** our PDF exam questions file. We Respect Privacy Policy Exam Score History.

NEW QUESTION: 1 DRAG DROP You are designing an Azure storage solution for a company. The company has the following storage requirements: An app named App1 uses data analytics on stored data. App1 must store data on a hierarchical filesystem that uses Azure Active Directory (Azure AD) access control lists. An app named App2 must have access to object-based storage. The storage must support role-based access control and use shared access signature keys. You need to design the storage solution. Which storage solution should you use for each app? To answer, drag the appropriate storage solutions to the correct apps. Each storage solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. Select and Place:

Answer: Explanation: Explanation/Reference: References:
