NEW QUESTION: 1Which best practice would the supply management professional use in order to analyze data for the purpose of helping users make better business decisions?**A.** Benchmarking**B.** Business intelligence**C.** Competitive intelligence**D.** Reengineering**Answer: B**
Explanation:The supply management professional would use business intelligence in order to analyze data for the purpose of helping users make better business decisions. Competitive intelligence is a systematic and ethical program for gathering, analyzing, and managing information about external business environments. Benchmarking compares the organization to other organizations and involves inventing, improvising, and learning each day. Reengineering involves the analysis and redesign of workflow within an organization.
