**NEW QUESTION: 2**You have a computer named Computer1 that runs Windows 10 Enterprise.

You plan to install the most recent updates to Computer1.You need to ensure that you can

revert to the current state of Computer1 in the event that the computer becomes unresponsive

after the update.What should you include in your solution?**A.** The Reset this PC option from the

Recovery section of the Settings app**B.** The Backup and Restore (Windows 7) control panel item

**C.** The Refresh your PC option from the PC Settings**D.** The Sync your settings options from the

Accounts section of the Settings app**Answer: B**Explanation:Explanation/Reference:

Explanation:The question states that you need to ensure that you can revert to the current

state of Computer1. The question does not specify what exactly the current state is in terms of

software configuration but it would be safe to assume that Computer1 has Windows Store Apps

installed, desktop applications installed and some previous Windows Updates installed.The

only way to recover the computer to its 'current' state is to perform a full backup of the

computer before updating it. Then if the computer becomes unresponsive after the update, we

can simply restore the backup to return the computer to its state at the time of the backup.
