NEW QUESTION: 2 The primary focus of nursing interventions for the child experiencing sickle cell crisis is aimed toward:
A. Providing pain relief
B. Preventing infection
C. Maintaining an adequate level of hydration
D. O2 therapy
Answer: C
Explanation: Explanation (A) Maintaining the hydration level is the focus for nursing intervention because dehydration enhances the sickling process. Both oral and parenteral fluids are used. (B) The pain is a result of the sickling process. Analgesics or narcotics will be used for symptom relief, but the underlying cause of the pain will be resolved with hydration. (C) Serious bacterial infections may result owing to splenic dysfunction. This is true at all times, not just during the acute period of a crisis. (D) O2 therapy is used for symptomatic relief of the hypoxia resulting from the sickling process. Hydration is the primary intervention to alleviate the dehydration that enhances the sickling process.

NEW QUESTION: 3 You want to implement persistent NAT for an internal resource so that external hosts are able to initiate communications to the resource, without the internal resource having previously sent packets to the external hosts. Which configuration setting will accomplish this goal?
A. persistent-nat permit target-host-port
B. persistent-nat permit any-remote-host
C. persistent-nat permit target-host
D. address-persistent
Answer: B
