NEW QUESTION: 1You are the security administrator for a large enterprise network with many remote locations. You have been given the assignment to deploy a Cisco IPS solution. Where in the network would be the best place to deploy Cisco IOS IPS?
A. at the entry point into the data center
B. inside the firewall of the corporate headquarters Internet connection
C. outside the firewall of the corporate headquarters Internet connection
D. at remote branch offices
Answer: D

NEW QUESTION: 2You are developing a custom date picker control for a Windows Store app. The control must meet the following requirements:
Inherit from the WinJS DatePicker control.
Provide an additional property to set if the date selection is required.
You need to ensure that the requirements are met.
How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
Select and Place:
Answer: Explanation:

NEW QUESTION: 3
A. isolation.device.edit.disable = "TRUE"
B. isolation.de.ice.edit.disable = "FALSE"
C. isolation.device.connectable.disable = "TRUE"
D. isolation.device.connectable.disable = "FALSE"
Answer: A, C
Explanation: Explanation Prevent a Virtual Machine User or Process from Disconnecting Devices in the vSphere Web Client
Users and processes without root or administrator privileges within virtual machines have the capability to connect or disconnect devices, such as network adaptors and CD-ROM drives, as well as the ability to modify device settings. To increase virtual machine security, remove these devices. If you do not want to permanently remove a device, you can prevent a virtual machine user or process from connecting or disconnecting the device from within the guest operating system.
Value
isolation.device.connectable.disable true
isolation.device.edit.disable true
