On the other hand, they also design [AZ-204 Reliable Test Topics](#) the displays according to the newest display technology.

**NEW QUESTION: 1** HOT SPOT **Answer:** Explanation: Explanation Box 1: No Line 7 executes fine as Name is the string Contoso. Box 2: Yes The assertion of Line 16 fails as the Boolean expression  $net \neq 0$  evaluates to false (500-500 equals 0). Note: An assertion verifies an assumption of truth for compared conditions. The assertion is central to the unit test. The Assert class provides many static methods for verifying suppositions of truth. If the condition being verified is not true, the assertion fails. The Assert class throws an AssertFailedException to signal a failure. Box 3: No The Boolean expression on line 22,  $balance \geq 0.0f$ , evaluates to  $0 \geq 0.0f$  (true), as balance is set to 0.0f at line 21, and because Contract.ensures is a postcondition. Note: The Contract.Ensures method specifies a postcondition contract for the enclosing method or property. References:
