**NEW QUESTION: 3**Your network contains an Active Directory domain named contoso.com. You have several WindowsPowerShell scripts that execute when users log on to their client computer.You need to ensure that all of the scripts execute completely before the users can access their desktop.Which setting should you configure? To answer, select the appropriate setting in the answer area.**Hot Area:Answer:** Explanation:Explanation: <http://technet.microsoft.com/en-us/library/cc958585.aspx>Run logon scripts synchronously Directs the system to wait for logon scripts to finish running before it starts the Windows Explorer interface program and creates the desktop. If you enable this policy, Windows Explorer does not start until the logon scripts have finished running. This setting assures that logon script processing is complete before the user starts working, but it can delay the appearance of the desktop. If you disable this policy or do not configure it, the logon scripts and Windows Explorer are not synchronized and can run simultaneously.
