NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You use dplyrXdf, and you discover that after you exit the session, the output files that were created were deleted.You need to prevent the files from being deleted.Solution: You use dplyrXdf with the outFile parameter and specify a path other than the working directory for dplyrXdf.Does this meet the goal?**A. Yes****B. No****Answer: A**Explanation:References:
<http://blog.revolutionanalytics.com/2016/12/dplyrxdf-090-now-available.html>

NEW QUESTION: 2The following token is added to the text of an email: {{lead.First Name:default=there}}.What is the purpose of the text ":default=there"?**A. To avoid an error message from showing if the field First Name is empty****B. To display "there" in the email if the field First Name is empty****C. To populate the first name field with "there" if the field First Name is empty****D. To avoid an error message from showing if the field Company is empty****Answer: A**

NEW QUESTION: 3Which one of the following is defined as the process of distributing incorrect Internet Protocol (IP) addresses/names with the intent of diverting traffic?**A. Port scanning****B. Network aliasing****C. Domain Name Server (DNS) poisoning****D. Reverse Address Resolution Protocol (ARP)****Answer: C**Explanation:This reference is close to the one listed DNS poisoning is the correct answer.This is how DNS DOS attack can occur. If the actual DNS records are unattainable to the attacker for him to alter in this fashion, which they should be, the attacker can insert this data into the cache of there server instead of replacing the actual records, which is referred to as cache poisoning.
