Especially important is to get yourself into the exam mindset **NSE7_OT5-7.2 Exam Format** by taking a full-length exam for 4 hours in one go when you are closer to your exam date, Our service.

NEW QUESTION: 1 Refer to the exhibit. Which statement about the SPAN and RSPAN configuration on SW1 is true? **A.** RSPAN session 1 is incompletely configured for monitoring. **B.** SPAN session 2 only monitors egress traffic exiting port FastEthernet 0/14. **C.** SPAN session 2 monitors all traffic entering and exiting port FastEthernet 0/15. **D.** RSPAN session 1 monitors activity on VLAN 50 of a remote switch. **Answer: A**

NEW QUESTION: 2 You have a virtual machine named VM1 that runs on a host named Host1. You configure VM1 to replicate to another host named Host2. Host2 is located in the same physical location as Host1. You need to add an additional replica of VM1. The replica will be located in a different physical site. What should you do? **A.** From VM1 on Host1, click Extend Replication. **B.** On Host2, configure the Hyper-V settings. **C.** On Host1, configure the Hyper-V settings. **D.** From VM1 on Host2, click Extend Replication. **Answer: D** Explanation: Extend Replication through UI: Before you Extend Replication to third site, you need to establish the replication between a primary server and replica server. Once that is done, go to replica site and from Hyper-V UI manager select the VM for which you want to extend the replication. Right click on VM and select "Replication->Extend Replication ...". This will open Extend Replication Wizard which is similar to Enable Replication Wizard. NOTE: You configure a server to receive replication with Hyper-V Manager, in this situation the replica site is assumed to be the Replica Server. Therefore you extend replication from VM1 on Host2. Note 2: With Hyper-V Extend Replication feature in Windows Server 2012 R2, customers can have multiple copies of data to protect them from different outage scenarios. For example, as a customer I might choose to keep my second DR site in the same campus or a few miles away while I want to keep my third copy of data across the continents to give added protection for my workloads. Hyper-V Replica Extend replication exactly addresses this problem by providing one more copy of workload at an extended site apart from replica site. Reference: Hyper-V Replica: Extend Replication <http://blogs.technet.com/b/virtualization/archive/2013/12/10/hyper-v-replica-extendreplication.aspx>

NEW QUESTION: 3 Refer to the exhibit An administrator is configuring an MPLS VPLS Martini solution on PE-1. The VPLS solution should connect customer A sites 1, 2, and 3 Where should

the administrator specify the LDP peers and pseudo wire (PW) label for the PWs?**A.** in a service instance on interface G1/0/1**B.** in a global cross-connect group**C.** in a Virtual Switch Instance (VSI) for customer **AD.** in service instances on interfaces Ten2/0/1 and Ten2/0/2**Answer: D**

NEW QUESTION: 4 Sie arbeiten als Administrator bei Contoso.com. Das Contoso.com-Netzwerk besteht aus zwei Active Directory-Gesamtstrukturen mit den Namen Contoso.com und test.com. Zwischen den Gesamtstrukturen ist keine Vertrauensstellung konfiguriert. Eine Sicherung des Gruppenrichtlinienobjekts (Group Policy Object, GPO) aus der Domäne test.com wird auf einem Domänencontroller in der Domäne Contoso.com gespeichert. Sie werden informiert, dass ein Gruppenrichtlinienobjekt in der Domäne "Contoso.com" erstellt werden muss und auf den Einstellungen des Gruppenrichtlinienobjekts in der Domäne "test.com" basieren muss. Zunächst erstellen Sie das neue Gruppenrichtlinienobjekt mit dem Windows PowerShell-Cmdlet "New-GPO". Sie möchten die Aufgabe über ein Windows PowerShell-Cmdlet ausführen. Welche der folgenden Maßnahmen sollten Sie ergreifen?**A.** Sie sollten in Betracht ziehen, das Windows PowerShell-Cmdlet New-GPLink zu verwenden.**B.** Sie sollten in Betracht ziehen, das Windows PowerShell-Cmdlet "GPO kopieren" zu verwenden.**C.** Sie sollten in Betracht ziehen, das Windows PowerShell-Cmdlet Invoke-GPUdate zu verwenden.**D.** Sie sollten in Betracht ziehen, das Windows PowerShell-Cmdlet "Import-GPO" zu verwenden.**Answer: D** Explanation: Erläuterung Import-GPO - Importiert die Gruppenrichtlinieneinstellungen von einem gesicherten Gruppenrichtlinienobjekt in ein angegebenes Gruppenrichtlinienobjekt.
