Preparing the Test initiative:, And we treat those comments with serious attitude and never stop the pace of making our AAPC CPC practice materials do better.

The best news is that during the whole year after purchasing, you will get the latest version of our CPC exam prep study materials for free, since as soon as we have compiled a new version of the CPC study materials, our company will send the latest one of our CPC study materials to your email immediately.

**NEW QUESTION: 1** Refer to the exhibit. In Cisco Unified Contact Center Enterprise Outbound Option when configuring Transfer to IVR campaign, which two nodes can be used in the routing script to transfer the call to an external script (CVP VXML application)? (Choose two.)  
**A.** Translation Route to VRU node  
**B.** Route Select node  
**C.** Go to Script node  
**D.** Send to VRU node  
**E.** Queue to Skill Group node  
**Answer: A,D**

**NEW QUESTION: 2A.** Hyper-V Hypervisor Virtual Processor  
**B.** Hyper-V Hypervisor Root Virtual Processor  
**C.** Hyper-V Hypervisor Logical Processor  
**D.** Processor  
**Answer: C**  
**Explanation:** Topic 6, Proseware, Inc Overview Proseware, Inc. is a mechanical equipment manufacturer. Proseware has a research department and a manufacturing department. Existing Environment Network Infrastructure The network contains a single Active Directory domain named proseware.com. The domain contains 100 Hyper-V hosts that run Windows Server 2008 R2 Service Pack 1 (SP1). The Hyper-V hosts host 400 virtual machines. Sixty of the virtual machines have Microsoft SQL Server 2008 R2 deployed. Both the research department and the manufacturing department use the SQL Server virtual machines. The infrastructure contains two private clouds. One private cloud contains all of the resources used by the research department. The other private cloud contains all of the resources used by the manufacturing department. The following System Center 2012 components are installed on the network:-----Orchestrator Service Manager Operations Manager Configuration Manager Data Protection Manager (DPM) Virtual Machine Manager (VMM) All servers are backed up by using DPM. The system state of the servers is not backed up. Configuration Manager only manages client computers. Application Infrastructure Proseware uses a third-party help desk application to manage user incidents. The manufacturing department uses a Microsoft .NET application named App1 that is critical for business operations. The research department uses a Microsoft Server Application Virtualization (Server App-V) virtual application package named App2. Problem Statements Proseware identifies the following issues:--Administrators are NOT notified when a service on any server fails. A virtual machine named VM2 has a service that stops and restarts often. When an alert is generated in Operations Manager, a help desk user has to generate a ticket manually

from the help desk application. A Hyper-V host named Server1 contains a virtual machine named VM1 that is assigned a high amount of memory. Users who connect to VM1 report that it takes a long time to access the resources on VM1. You suspect that the memory assigned to VM1 spans more than one NUMA node. RequirementsPlanned ChangesProseware plans to implement the following changes: Replace the help desk application with a new, centralized incident management solution. Provide the users in the research department with an automated solution to provision virtual machines. The users will manage their respective virtual machine by using a self-service portal. Technical RequirementsProseware has identified the following technical requirements for the private cloud infrastructure:-----The number of required virtual machine templates must be minimized.A centralized automated task must restart failed services on the virtual machines.Administrators must be notified by an SMS message when an alert on a manufacturing server is generated.Servers that are out of compliance with the Payment Card Industry Data SecurityStandard (PCI DSS) must be identified.Administrators must be able to perform a bare metal recovery of the Hyper-V hosts and the virtual machines by using DPM.In a single operation, administrators must be able to perform a rollback of the updates applied to the servers that host App2.----- -Windows Server and SQL Server configurations that do NOT adhere to Microsoft best practices and are misconfigured must be identified. All virtual machines created by self-service users must use Dynamic Memory. Administrators must be able to create virtual machines that do NOT use Dynamic Memory. Administrators must be notified when an alert on a server in the research department is generated. Between 09:00 and 17:00, the administrators must be notified by email. After 17:00, the administrators must be notified by an SMS message. Monitoring RequirementsApp1 must be monitored to retrieve the following information:---The amount of time it takes to respond to user queries The amount of time it takes to load a webpage Debugging informationIf App2 fails to mount on a server, an administrator must receive an alert.

**NEW QUESTION: 3**You have a Microsoft Exchange Online subscription that contains the groups shown in the following table.You have the recipients shown in the following table.The groups contain the members shown in the following table.For each of the following statements, select Yes if the statement is true. Otherwise, select No.NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationReferences:
