What makes Estruturit material better than others?

NEW QUESTION: 1Note: This questions is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.You deploy Microsoft SQL Server to a virtual machine in Azure. You distribute the database files and filegroups across multiple Azure storage disks.You must be able to manage the databases as individual entities by using SQL Server Management Studio. All data in the databases must be stored encrypted. Backups must be encrypted by using the same key as the live copy of the database.You need to secure the data.What should you implement?**A.** Encrypting File System**B.** Always Encrypted**C.** BitLocker**D.** transport-level encryption**E.** dynamic data masking**F.** cell-level encryption**G.** Transparent Data Encryption**Answer: G**Explanation:ExplanationTransparent data encryption (TDE) encrypts your databases, associated backups, and transaction log files at rest without requiring changes to your applications.TDE encrypts the storage of an entire database by using a symmetric key called the database encryption key.In SQL Database the database encryption key is protected by a built-in server certificate. The built-in server certificate is unique for each SQL Database server.References: <https://msdn.microsoft.com/en-us/library/dn948096.aspx>

NEW QUESTION: 2You work as the Network Administrator for XYZ CORP. The company has a Unix-based network. You want to set the user login features on the systems with the shadow passwords.Which of the following Unix configuration files can you use to accomplish the task?**Answer:** Explanation:D is incorrect. In Unix, the /etc/filesystems file is used to set the filesystem probe order whenfilesystems are mounted with the auto option.
