In order to serve our customers in a better way, our IT experts exert all energies to collect the latest information about our Fortinet NSE4_FGT-7.0 test study engine and keep the accuracy of questions and answers of the exam.

NEW QUESTION: 1You need to design a resource governance solution for an Azure subscription. The solution must meet the following requirements: * Ensure that all ExpressRoute resources are created in a resource group named RG1. * Delegate the creation of the ExpressRoute resources to an Azure Active Directory (Azure AD) group named Networking. * Use the principle of least privilege. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation Box 1: An Azure policy assignment at the subscription level that has an exclusion Box 2: A custom RBAC role assignment at the level of RG1 Azure role-based access control (Azure RBAC) is the authorization system you use to manage access to Azure resources. To grant access, you assign roles to users, groups, service principals, or managed identities at a particular scope. Reference:

<https://docs.microsoft.com/en-us/azure/governance/policy/tutorials/create-and-manage>

NEW QUESTION: 2A new storage network is being designed. Which of the following would be the MOST appropriate process to address storage planning? **A.** A disk to disk to tape grandfathering scheme so as to ensure that an appropriate backup scheme is in place. **B.** Fixed data retention periods so that storage is rolled over based on an aging cycle. **C.** A Virtual Tape Library with multi-path 10 to provide high availability connected via 10GBps SAN switches. **D.** A tiered approach utilizing short term online, medium term near-line, and long term offline storage. **Answer: D**

NEW QUESTION: 3You are administering a database and you receive a requirement to apply the following restrictions: 1. A connection must be terminated after four unsuccessful login attempts by user. 2. A user should not be able to create more than four simultaneous sessions. 3. User session must be terminated after 15 minutes of inactivity. 4. Users must be prompted to change their passwords every 15 days. How would you accomplish these requirements? **A.** by granting a secure application role to the users **B.** By implementing the database resource Manager plan and setting the SEC_MAX_FAILED_LOGIN_ATTEMPTS parameters to 4. **C.** By creating and assigning a profile to the users and setting the SEC_MAX_FAILED_LOGIN_ATTEMPTS parameter to 4. **D.** by creating and assigning a profile to the users and setting the REMOTE_OS_AUTHENT parameter to FALSE. **E.** By Implementing Fine-Grained Auditing (FGA) and setting the REMOTE_LOGIN_PASSWORD_FILE parameter to NONE. **Answer: C** Explanation: Explanation/Reference: Explanation:

SEC_MAX_FAILED_LOGIN_ATTEMPTS specifies the number of authentication attempts that can be made by a client on a connection to the server process. These login attempts can be for multiple user accounts in the same connection. After the specified number of failure attempts,

the connection will be automatically dropped by the server process.References:
