**NEW QUESTION: 1** Sie konfigurieren den automatischen VPN-Trigger für fünf Windows 10 Enterprise-Computer. Wenn Sie die Computer testen, lösen sie das VPN die ganze Zeit aus, auch im Büro. Sie müssen den automatischen VPN-Trigger so konfigurieren, dass er nur funktioniert, wenn VPN erforderlich ist. Welchen Befehl solltest du verwenden?  
**A.** Add -VpnConnectionTriggerApplication [-Name] <string> -ApplicationID <String []> -PassThru  
**B.** Set -VpnConnectionTriggerDnsConfiguration [-Name] <string> [-DnsSuffix <String>] [-DnsIPAddress <string []>] [-DnsSuffixSearchList  
**C.** Add -VpnConnectionTriggerDnsConfiguration [-Name] <string> -DnsSuffix <String> [-DnsIPAddress <string []>] -PassThru  
**D.** -VpnConnectionTriggerTrusted Network hinzufügen [-Name] <string> [-DnsSuffix] <string []>

**Answer: D**

**NEW QUESTION: 2** A company plans to expand by hiring new engineers who work in highly specialized areas. Each engineer will have very different job requirements and use unique tools and applications in their job. Which of the following is MOST appropriate to use?  
**A.** Credential management  
**B.** Role-based privileges  
**C.** User assigned privileges  
**D.** User access  
**Answer: B**  
Explanation: In this question, we have engineers who require different tools and applications according to their specialized job function. We can therefore use the Role-Based Access Control model. Role-Based Access Control (RBAC) models approach the problem of access control based on established roles in an organization. RBAC models implement access by job function or by responsibility. Each employee has one or more roles that allow access to specific information. If a person moves from one role to another, the access for the previous role will no longer be available. Instead of thinking "Denise needs to be able to edit files," RBAC uses the logic "Editors need to be able to edit files" and "Denise is a member of the Editors group." This model is always good for use in an environment in which there is high employee turnover.  
Incorrect Answers:  
**B.** Credential management is the management or storage of usernames and passwords. Credential management is not used to assign privileges or software configurations. Therefore, this answer is incorrect.  
**C.** We could use user assigned privileges. However, this involves configuring privileges on a per user basis. Every time a new engineer starts, you would have to configure his privileges. Therefore, this answer is incorrect.  
**D.** User access is a generic term, not a specific configuration. We need to configure user access but other answers define how the user access is configured. Therefore, this answer is incorrect.

**NEW QUESTION: 3** On your Oracle 12c database, you Issue the following commands to create

indexes SQL > CREATE INDEX oe.ord\_customer\_ix1 ON oe.orders (customers\_id, sales\_rep\_id) INVISIBLE; SQL> CREATE BITMAP INDEX oe.ord\_customer\_ix2 ON oe.orders (customers\_id, sales\_rep\_id); Which two statements are correct? (Choose two.)**A.** Both the indexes are updated when a new row is inserted, updated, or deleted in the orders table.**B.** Only the ORD\_CUSTOMER\_IX2 index is created.**C.** Both the indexes are created; however, only the ORD\_COSTOMER index is visible.**D.** The optimizer evaluates index access from both the indexes before deciding on which index to use for query execution plan.**E.** Only the ORD\_CUSTOMER\_IX1 index is created.**Answer: A,C**Explanation:Explanation/Reference: Explanation:11G has a new feature called Invisible Indexes. An invisible index is invisible to the optimizer as default. Using this feature we can test a new index without effecting the execution plans of the existing sql statements or we can test the effect of dropping an index without dropping it.

**NEW QUESTION:** 4K plc is a large listed company in the retail industry. It has recently appointed T as a non-executive director. T has never had any previous involvement with K plc but is well known to K's Chief Executive P because T is the Managing Director of K plc's largest supplier. K has recently expanded into Asia. Doubts about the wisdom of the move have been expressed in the financial press with some journalists commenting that it has exposed K plc to higher degrees of risk than previously. The move had been approved by the Risk Committee which consists of four Non-Executive Directors (NEDs) all of whom have significant experience in business. K plc does not have a Nominations Committee. Nominations to the Board are usually proposed by P and generally agreed by the other directors. In relation to the above scenario which of the following comments is valid?**A.** K plc is in line with best practice as it only has NEDs on its Risk Committee.**B.** The Risk Committee should have rejected the proposal to enter the Asian market merely because it exposed K to greater risk than the other markets in which it operates.**C.** There is no possible conflict of interest in relation to T's position as a NED and as Managing Director of a supplier company since, in both roles, he would clearly want K plc to prosper.**D.** The absence of a Nominations Committee exposes K plc to the risk that the Chief Executive may have unfettered power.**Answer: D**
