Which Intercetor appliance diagnostic tool did the administrator use?**A.** The command "debug validate deployment".**B.** The command "debug deployment validation".**C.** The command "connection tracing".**D.** The command "debug tracing".**Answer: A**

NEW QUESTION: 2Sie verwenden sysprep, um ein System für das Imaging vorzubereiten.Sie möchten Endbenutzern ermöglichen, ihr Windows-Betriebssystem anzupassen, Benutzerkonten zu erstellen, den Computer zu benennen und andere Aufgaben auszuführen. Welche Sysprep-Einstellung sollten Sie verwenden?**A.** / unbeaufsichtigt**B.** / generalize**C.** / oobe**D.** / audit**Answer: C****Explanation:**ErläuterungDie Option / oobe startet den Computer neu im Windows-Willkommensmodus. Mit der Windows-Willkommenseite können Endbenutzer ihr Windows-Betriebssystem anpassen, Benutzerkonten erstellen, den Computer benennen und andere Aufgaben ausführen. Alle Einstellungen in der OOBE-Systemkonfigurationsübergabe in einer Antwortdatei werden unmittelbar vor dem Start der Windows-Willkommenseite verarbeitet.

NEW QUESTION: 3According to ITIL@ v3 framework, which type of warranty assurance provides a customer with a measured confidence that services are available within defined geographical locations and scheduled times?**A.** security**B.** continuity**C.** capacity**D.** availability**Answer: D**

NEW QUESTION: 4You are building a custom Azure function app to connect to Azure Event Grid.You need to ensure that resources are allocated dynamically to the function app. Billing must be based on the executions of the app.What should you configure when you create the

function app? **A.** the Docker container and an App Service plan that uses the B1 pricing tier **B.** the Windows operating system and the App Service plan hosting plan **C.** the Docker container and an App Service plan that uses the S1 pricing **D.** the Windows operating system and the Consumption plan hosting plan **Answer: D** Explanation: Explanation Azure Functions runs in two different modes: Consumption plan and Azure App Service plan. The Consumption plan automatically allocates compute power when your code is running. Your app is scaled out when needed to handle load, and scaled down when code is not running.

Topic 1, Contoso Ltd Overview Contoso, Ltd. is a manufacturing company that has offices worldwide. Contoso works with partner organizations to bring products to market. Contoso products are manufactured by using blueprint files that the company authors and maintains.

Existing Environment Currently, Contoso uses multiple types of servers for business operations, including the following:

- * File servers
- * Domain controllers
- * Microsoft SQL Server servers

Your network contains an Active Directory forest named contoso.com. All servers and client computers are joined to Active Directory. You have a public-facing application named App1. App1 is comprised of the following three tiers:

- * A SQL database
- * A web front end
- * A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Requirements

Planned Changes Contoso plans to implement the following changes to the infrastructure:

- Move all the tiers of App1 to Azure.
- Move the existing product blueprint files to Azure Blob storage.
- Create a hybrid directory to support an upcoming Microsoft Office 365 migration project.

Technical Requirements Contoso must meet the following technical requirements:

- * Move all the virtual machines for App1 to Azure.
- * Minimize the number of open ports between the App1 tiers.
- * Ensure that all the virtual machines for App1 are protected by backups.
- * Copy the blueprint files to Azure over the Internet.
- * Ensure that the blueprint files are stored in the archive storage tier.
- * Ensure that partner access to the blueprint files is secured and temporary.
- * Prevent user passwords or hashes of passwords from being stored in Azure.
- * Use unmanaged standard storage for the hard disks of the virtual machines.
- * Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

Minimize administrative effort whenever possible.

User Requirements Contoso identifies the following requirements for users:

- Ensure that only users who are part of a group named Pilot can join devices to Azure AD.
- Designate a new user named Admin1 as the service administrator of the Azure subscription.
- Ensure that a new user named User3 can create network objects for the Azure subscription.
