NEW QUESTION: 2 The imputed interest rate used in the residual income approach to performance evaluation can best be described as the: **A.** Target return on investment set by the company's management. **B.** Average return on investments for the company over the last several years. **C.** Historical weighted average cost of capital for the company. **D.** Marginal after-tax cost of capital on new equity capital. **Answer: A** Explanation: Choice "b" is correct. The imputed interest rate used in the residual income approach can best be described as the target return on investment set by the company's management. Choice "a" is incorrect, but it is a close second. The historical weighted average cost of capital may be how management sets the target return on investment. Choice "c" is incorrect. The average return on investments for past years may not be a good indication of management's future intentions. Choice "d" is incorrect. Marginal after-tax cost of capital on new equity may be how management sets its targets, but it may not be, too.
