**NEW QUESTION: 1** HOTSPOT You need to recommend a solution to meet the monitoring requirements for the database administrators. Which components should you recommend deploying in Operations Manager and SharePoint Server 2010? (To answer, select the appropriate components in the answer area.)  
**Hot Area:**  
**Answer:** Explanation:  
Explanation/Reference: <http://technet.microsoft.com/en-us/library/hh212924.aspx> - Using SharePoint to View Operations Manager Data  
How to Deploy the Operations Manager Web Part  
Before you can add the Operations Manager Web Part to a SharePoint page, the Web Part must be deployed to the SharePoint site. The Operations Manager web console must be installed on a management server:  
How to Add the Operations Manager Web Part to a SharePoint Page  
After you deploy the Operations Manager web part to a SharePoint site, you can add the web part to pages. When you add the web part, you configure it to display a specific dashboard view. For the configuration, you will need the URI for the dashboard view that you want displayed.  
How to Configure the Web Part to Connect to a Web Console  
After the web part is deployed and activated, you must configure the web part to connect to a web console or environment. You can add more environments at any time. Use the following procedure to configure the environment for a web part.  
To configure the environment for a web part by using the user interface  
1. On the SharePoint central administration site, in the Site Actions dropdown menu, click View All Site Content.  
2. In Lists, click Operations Manager Web Console Environments.  
3. Click Add new item.  
4. In the Name field, enter a unique name.  
5. In the Host URI field, enter the URI to a server hosting the Operations Manager web console. For example: <http://ServerName/OperationsManager/>  
6. Click Save.

**NEW QUESTION: 2** Consider the following Nmap output: what command-line parameter could you use to determine the type and version number of the web server?
