2024 100% Free D-PDC-DY-23 -High-quality 100% Free Test Dumps Free | D-PDC-DY-23 Free Updates

Secondly, our D-PDC-DY-23 study materials provide 3 versions and multiple functions to make the learners have no learning obstacles, We can make promise that you will harvest enough knowledge and happiness from our D-PDC-DY-23 test engine.

More choices, The on sale D-PDC-DY-23 exam cram is the latest research and development

result that we aim at the characters of the latest real test questions, The trick is also not to study hard, it's to study smart.

Each year there are many people pass the exam with the help of D-PDC-DY-23 online test engine training, If the materials updated, we will automatically send the latest to your mailbox.

First of all, our training material is compiled and checked by our professional D-PDC-DY-23 Exam Tips experts, We firmly believe that you cannot be an exception, Here are some outstanding properties which can benefit all of you.

NEW QUESTION: 1An organization has hosted an application on the EC2 instances. There will be multiple users connecting to the instance for setup and configuration of application. The organization is planning to implement certain security best practices. Which of the below mentioned pointers will not help the organization achieve better security arrangement?**A.** Apply the latest patch of OS and always keep it updated.**B.** Create a procedure to revoke the access rights of the individual user when they are not required to connect to EC2 instance anymore for the purpose of application configuration.**C.** Disable the password based login for all the users. All the users should use their own keys to connect with the instance securely.**D.** Allow only IAM users to connect with the EC2 instances with their own secret access key.

Answer: DExplanation:Since AWS is a public cloud any application hosted on EC2 is prone to hacker attacks. It becomes extremely important for a user to setup a proper security mechanism on the EC2 instances. A few of the security measures are listed below:Always keep the OS updated with the latest patchAlways create separate users with in OS if they need to connect with the EC2 instances, create their keys and disable their password Create a procedure using which the admin can revoke the access of the user when the business work on the EC2 instance is completed Lock down unnecessary ports Audit any proprietary applications that the user may be running on the EC2 instance Provide temporary escalated privileges, such as sudo for users who need to perform occasional privileged tasks The IAM is useful when users are required to work with AWS resources and actions, such as launching an instance. It is not useful to connect (RDP / SSH) with an instance.Reference:
