NEW QUESTION: 1A. Invoke-WsusServerCleanup**B.** Set-WsusServerSynchronization**C.** wsusutil.exe /import**D.** wsusutil.exe /reset**Answer: D****Explanation:**Explanation <https://technet.microsoft.com/en-us/library/cc720466%28v=ws.10%29.aspx?f=255&MSPPError=-2147217396> WSUSutil.exe is a tool that you can use to manage your WSUS server from the command line. WSUSutil.exe is located in the %drive%\Program Files\UpdateServices\Tools folder on your WSUS server. You can run specific commands with WSUSutil.exe to perform specific functions, as summarized in the following table. The syntax you would use to run WSUSutil.exe with specific commands follows the table.

NEW QUESTION: 2 You need to meet the connectivity requirement for the Exchange ActiveSync clients after the planned upgrade. What should you do?**A.** Modify the Web.config file.**B.** Modify the EdgeTransport.exe.config file.**C.** Run the Set-ActiveSyncMailboxPolicy cmdlet**D.** Run the Set-TransportConfig cmdlet.**Answer: A****Explanation:**Explanation [https://technet.microsoft.com/en-us/library/hh529949\(v=exchg.150\).aspx](https://technet.microsoft.com/en-us/library/hh529949(v=exchg.150).aspx) Topic 2, Fabrikam inc. Overview Fabrikam, Inc. is an international manufacturing company that has 5,000 employees. The company has sales, marketing research and human resources departments. Fabrikam has two main offices and three branch offices. The main offices are located in New York and London. The branch offices are located in Seattle, Montreal, and Paris. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. The WAN connections from the main offices to the branch offices are reliable. Existing Environment The Exchange Server organization contains servers that have either Exchange Server 2010 or Exchange Server 2013 installed. Each main office contains two Exchange Server 2013 servers. Each branch office contains one Exchange Server 2010 server. MX records are configured to deliver email to offices in New York and London. Email is delivered to the London office only if the New York office is unavailable. Each office is configured to use a separate namespace for client access. The New York office is configured to use a namespace of mail.fabrikam.com. The servers in the New York and London offices are members of a database availability group (DAG). Each mailbox database in the New York and London offices has three copies. The technical support staff in the branch offices have administrative access to the existing Exchange servers and are assigned Organization Management permissions. Users from the sales department frequently send email messages that contain the Social Security number of customers in the United States. Problem Statements Fabrikam identifies the following issues on the network: * Users in the Paris office report that when launching Microsoft Outlook, they receive a security alert indicating a certificate name mismatch. The security alert is not generated when they connect to Outlook Web Access. Users from the other offices do not report receiving the security alert. * Network administrators report that the mailbox databases in the New York office sometimes activate on the Exchange servers in the London office, resulting in poor performance for the New York office users. Planned Changes Fabrikam plans to implement the following changes to the network: * Upgrade the organization to Exchange

Server 2016 during the next six months.* Enable online document viewing and editing from Outlook on the web.High Availability RequirementsFabrikam identifies the following high-availability requirements for the planned deployment:* Mailbox databases that contain mailboxes for the New York office users must only be activated on the servers in the London office manually.* All client access connections to the London and New York offices must use load-balanced namespaces. The load balancing mechanism must perform health checks. Security and compliance requirementsFabrikam identifies the following security and compliance requirements:* After the planned upgrade, the maximum mailbox size must be 5 GB.* Administrators from the branch offices must be able to view the mailbox properties and reset the passwords of the users, but must be prevented from changing the mailbox database configurations.* Users who are involved in legal disputes with customers must be prevented from permanently deleting email messages pertaining to the dispute. The users must be able to delete all other messages permanently.* If a user enters a Social Security number in an email message addressed to an external recipient, the user must receive a notification before sending the message If the user sends the message. The message must not be delivered. A compliance officer must be notified of the violation.Connectivity requirementsFabrikam identifies the following connectivity requirements:* Connections for inbound and outbound email must be initiated and terminated from an Edge Transport server in the perimeter network.* All external client connections from the branch office users must be proxied from the New York office to the branch offices.* The number of namespaces used for client access must be minimized.

NEW QUESTION: 3Exhibit:Which two statements regarding the output shown in the exhibit are correct? (Choose two.)**A.** The PEs have matching control word values.**B.** The type of connection is remote.**C.** The type of connection is local.**D.** The label associated with this virtual circuit is out of range.**Answer: A,B**

NEW QUESTION: 4A. 127.0.0.1**B.** 255.255.255.254**C.** 255.0.0.0**D.** 255.255.255.0**Answer: C**
