NEW QUESTION: 1An interface to a library of software functions that provide security and cryptography services is called:**A.** An assurance application programming interface (AAPI)**B.** A confidentiality, integrity and availability application programming interface (CIAAPI)**C.** A cryptographic application programming interface (CAPI)**D.** A security application programming interface (SAPI)**Answer: C****Explanation:**CAPI is designed for software developers to call functions from the library and, thus, make it easier to implement security services. An example of a CAPI is the Generic Security Service API (GSSAPI.) The GSS-API provides data confidentiality, authentication, and data integrity services and supports the use of both public and secret key mechanisms. The GSS-API is described in the Internet Proposed Standard RFC 2078. The other answers are made-up distracters.
