NEW QUESTION: 1In the customers table, the CUST_CITY column contains the value 'Paris' for the CUST_FIRST_NAME 'Abigail'. Evaluate the following query: What would be the outcome? **A.** An error message **B.** Abigail ISC. Abigail Pa **D.** Abigail PA **Answer: C**

NEW QUESTION: 2 During a test of a disaster recovery plan the IT systems are concurrently set up at the alternate site. The results are compared to the results of regular processing at the original site. What kind of testing has taken place? **A.** Checklist **B.** Parallel **C.** Simulation **D.** Full interruption **Answer: B** Explanation: The five types of BCP testing are: Checklist-Copies of the plan are sent to different department managers and business unit managers for review. This is a simple test and should be used in conjunction with other tests. Structured Walk-through-Team members and other individuals responsible for recovery meet and walk through the plan step-by-step to identify errors or assumptions. Simulation-This is a simulation of an actual emergency. Members of the response team act in the same way as if there was a real emergency. Parallel-This is similar to simulation testing, but the primary site is uninterrupted and critical systems are run in parallel at the alternative and primary sites. The systems are then compared to ensure all systems are in sync. Full interruption-This test involves all facets of the company in a response to an emergency. It mimics a real disaster where all steps are performed to test the plan. Systems are shut down at the primary site and all individuals who would be involved in a real emergency, including internal and external organizations, participate in the test. This test is the most detailed, time-consuming, and expensive all of these. The following answers were all incorrect: Simulation Checklist Full interruption The following reference(s) were/was used to create this question: Chapter 9: Business Continuity and Disaster Recovery CISSP Certification All-in-One Exam Guide, 4th Edition, Shon Harris

NEW QUESTION: 3 DRAG DROP Your company manages several Azure Web Apps that are running in an existing App Service plan named plan1. You need to move one of the Web Apps named contoso, to a new App Service plan named plan2. How should you complete the Azure PowerShell command?? To answer, drag the appropriate Azure PowerShell segment to the correct location. Each PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation:
