Answer: A Explanation: Explanation

<https://cloud.google.com/iam/docs/understanding-service-accounts> Migrating data to Google Cloud Platform Let's say that you have some data processing that happens on another cloud provider and you want to transfer the processed data to Google Cloud Platform. You can use a service account from the virtual machines on the external cloud to push the data to Google Cloud Platform. To do this, you must create and download a service account key when you create the service account and then use that key from the external process to call the Cloud

Platform APIs.References:
